# JERUSHA JJ

BE COMPUTER SCIENCE ENGINEERING (AI & ROBOTICS)

## CONTACT

7358909652

jerushajj22@gmail.com

Chennai, Tamilnadu, India

www.linkedin.com/in/jerusha-jj-702133252

## EDUCATION

**SATHYABAMA INSTITUTE OF SCIENCE & TECHNOLOGY, CHENNAI**

B.E. CSE (AI & Robotics)
2024–2028 | CGPA: 8.3

**CHRISTURAJA MATRIC HR. SEC. SCHOOL, MARTHANDAM**

2009–2024 | 71.8%

## SKILLS

- Technical: Python, HTML, MySQL, VS Code
- Soft Skills: Communication, Teamwork, Problem Solving, Coordination, Management

## WORK EXPERIENCE

- THREX Hackathon – AI & Robotics Participant (Top 5 Finalist)
- Team Lead – AWS Club (Volunteer)
- Event Organizer – Planned and coordinated a college event
- AI Industrial Training Internship – Eduversity

## CERTIFICATIONS

- Machine Learning Onramp – MathWorks (Sept 2026)
- Experimental Robotics – NPTEL, IIT Kharagpur (Elite, Feb-Mar 2026)
- Roboyudh 2026 – Participation, Sathyabama Institute (Feb 2026)

## PROFILE

**OBJECTIVE**

Aspiring computer science intern eager to apply programming and problem-solving skills in a real-world environment. Looking to gain hands-on experience and contribute to meaningful projects. Strong in coordination, management and event organizing.

## PROJECTS

### Robot Dog (Rex) — 2026 - PRESENT

Technologies: Python, Machine Learning, ROS2 (Integration)

- Developed and trained the machine learning component for command classification.
- Worked on feature extraction and model logic for recognizing robot commands.
- Prepared the ML pipeline for future integration with wake-word and speech modules.
- Evaluated model performance and improved prediction accuracy through iterative tuning.

### Multilingual Cyberbullying Detection — 2025-2026

Technologies: Python, Transformers, Deep Learning, NLP

- Developed a transformer-based deep learning model to detect cyberbullying in multilingual social media text.
- Fine-tuned pretrained multilingual transformer models to classify bullying and non-bullying content.
- Evaluated model performance and improved detection accuracy through iterative tuning.

### Smart Print Queue Management System — 2025-2026

Technologies: Python, MySQL

- Built a system to manage printing jobs efficiently and reduce waiting time.

### AI Skill Analysis — 2025-2026

Technologies: Python, AI / Machine Learning

- Developed an AI-based system to analyze skills and identify strengths and gaps.
- Implemented logic to process input data and generate skill insights.
- Evaluated results and refined accuracy through iterative testing.

### Tail Tune – Pet Emotion Detection System — 2024-2025

Technologies: Python, AI, Rule-Based Logic

- Developed an AI-based system to detect dog and cat emotions using vocal inputs.
- Implemented rule-based logic to classify excitement, stress, and sadness.
- Designed the project architecture for future health monitoring integration.
